CHRONIC CARE MANAGEMENT PLAN
BIPOLAR MOOD DISORDER OVERVIEW

What is bipolar mood disorder?
Bipolar mood disorder is considered to be a serious psychiatric disorder that, if active, requires effective treatment. It is a leading cause of disability and, if not under control, greatly reduces employability. Even if mood swings are not readily observable, many people may have ongoing problems with symptoms of depression. There are two subtypes: Bipolar I and Bipolar II. Those who suffer from Bipolar II never experience all-out manic episodes.

Common symptoms of bipolar mood disorder include:

- Symptoms of anxiety and/or depression
- Impulsivity
- Recklessness
- Elevated libido
- Poor insight
- Inattention
- Sensory hyperactivity
- Family history of illness
- Sudden withdrawal from activities and isolation from friends

This psychiatric disorder can be associated with coexisting disorders, such as:

- Substance abuse/dependence
- Overeating
- ADHD
- Impulse-control disorder
- Possibility of heightened risks of suicide and violence

Assessment of suicide risk should include presence of suicidal or homicidal ideation, access to lethal means, any command hallucinations, previous attempts, family history, and alcohol/drug abuse.

Treatment
In Job Corps, the goal of treatment for bipolar mood disorder should be to help the student make progress toward employability.

Psychotherapy should be cognitive-behaviorally focused and emphasize education about stressors, sleep hygiene, symptoms of relapse, and medication compliance. Other psychological issues include the emotional consequences of mood swings, coping with a chronic psychiatric disorder, stigmatization, developmental delays, fear of relapse, interpersonal challenges, and academic, occupational, and legal issues.

Pharmacotherapy may include lithium, divalproex, lamotrigine, carbamazepine, olanzapine, ziprasidone, quetiapine, and aripiprazole. Typically, those with bipolar mood disorder require more than one medication in their regimen and cognitive therapy. Utilizing the psychotherapy to complement pharmacotherapy is an important principle of treatment.

CHRONIC CARE MANAGEMENT PLAN
BIPOLAR MOOD DISORDER

OUTREACH AND ADMISSIONS PERIOD

Please provide us with the following information regarding the applicant’s self-disclosed diagnosis of Bipolar Disorder. [To be obtained from applicant’s physician or other health provider.]

1. Classification of Bipolar Mood Disorder
   _____ Mild intermittent—symptoms absent with medication, and no pressure
   _____ Mild persistent—symptoms more than twice a week, less than daily
   _____ Moderate persistent—daily symptoms, but can usually ignore
   _____ Severe, persistent—continual symptoms, even with treatment compliance

2. Date of diagnosis: __________________________

3. Age of onset: __________________________

4. What are the current symptoms?

____________________________________________________________________________________

5. List current (within the past 6 months) self-harm behaviors, if applicable.

____________________________________________________________________________________

6. List current medications and/or treatment, including dosage and frequency.

____________________________________________________________________________________

7. Has applicant been compliant with medications and treatment? If no, explain.

____________________________________________________________________________________

8. List past hospitalizations related to bipolar symptoms, including dates, reason admitted, and discharge summary.

____________________________________________________________________________________

9. What is the current status?

____________________________________________________________________________________

10. What is the applicant’s prognosis with medication?

____________________________________________________________________________________

10a. What is the applicant’s prognosis without medication?

____________________________________________________________________________________

11. When was last appointment? __________________________
12. Will applicant need to continue follow-up under your care? If yes, please list date and/or frequency of follow-up appointments.

13. In your opinion, will the applicant be able to self-manage his/her medications unsupervised and participate in a non-mental health residential vocational training program? If no, explain.

14. In your opinion, will the applicant be appropriate to reside in a non-mental health dormitory-style residence with minimal supervision? If no, please explain.

15. Are there any restrictions or limitations related to this specific illness?

16. List any precipitants that could induce increased symptoms.

17. List any environmental features that might trigger worsening symptoms (e.g., noisy room, crowded room with strangers, family gatherings, etc.).

Please sign below and return the form in the attached addressed envelope.

CHRONIC CARE MANAGEMENT PLAN
BIPOLAR MOOD DISORDER

Goals:
1. Enhance employability by optimizing control of symptoms
2. Educate the student regarding recognition of symptoms and self-management
3. Reduce environmental triggers, which might set off increased symptoms
4. Optimize pharmacotherapy, based on students past and current experience
5. Help student develop outline of plans to arrange for optimal care after graduation

This care management plan includes suggested clinical activities and accommodations that are not mandatory for any particular student. In keeping with the importance of individualized care, please choose those that are most appropriate for this particular student’s care plan, considering the specific presentation of the problem and needs of the student. The overall goal is to develop a care plan that supports the student’s goal toward employability.

Mark each item with an X that is part of the student’s case management plan.

OUTREACH AND ADMISSIONS

- Conduct clinical file review
- Request additional health and educational information for file review, if needed
- Refer and participate with IDT team for accommodation planning

CAREER PREPARATION PERIOD

- Screen for co-occurring disorders
- Establish a symptom action plan for current or returning symptoms
- Evaluate need for brief on-center treatment
- Evaluate need for outside mental health resources
- Arrange for continued off-center appointments with physician and/or therapist
- Discuss vocational training match
- Develop safety/behavior plan with student
- Review center emergency response plan
- Refer to center physician or consulting psychiatrist for medication evaluation if indicated
- Consult with center physician or consulting psychiatrist to provide a written schedule of medications and calendar of compliance
- Consult with center physician or consulting psychiatrist to provide a written description of possible medication side effects
- Consult with oral health and wellness staff about the effects of psychotropic medications on oral care, if applicable. Reduced saliva (dry mouth), a side effect from some medications, can cause oral health care problems
- Provide student with sleep hygiene brochure, if appropriate (http://jchealth.jobcorps.gov/health-topics/gh/gh-docs/)
- Refer to TEAP, if appropriate
- Refer to anger and/or stress management group
- Refer to TUPP/smoking cessation enrollment
- Refer to recreation to practice social and group recreation skills
- Educate student about self-care plans to monitor and cope with symptoms of Bipolar Mood Disorder:
  - Identify a pattern to the student’s episodes of bipolar disorder and what triggers them
  - Coping skills
  - Compliance with therapy and/or medication appointments
  - Medication compliance if needed
  - Managing bipolar symptoms in the employment setting
  - Refer to Web site http://www.ndmda.org/ for support with BPD management
- Document weekly or agreed-upon case management review with counselors

I agree with the care management plan for the Career Preparation Period:

### CAREER TRANSITION PERIOD

<table>
<thead>
<tr>
<th>Conduct a health and wellness center exit interview approximately 4 weeks before program completion and review self-management skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>Work with the career transition specialist to identify potential sources of mental health care, and specialty care if needed, in the work community</td>
</tr>
<tr>
<td>Work with the HWM to obtain signed HIPAA authorizations for the transfer of student health records to identified health care providers</td>
</tr>
<tr>
<td>Work with the HWM and career transition specialist in assisting the student in enrolling or maintaining enrollment in a public or private health insurance program</td>
</tr>
<tr>
<td>Provide student with copy of SF-93, SF-88, and management plan, including sleep and mood charts, if any</td>
</tr>
<tr>
<td>Work with HWM and/or center physician to provide student with adequate supply of medication(s) at departure</td>
</tr>
<tr>
<td>Consult with the disability coordinator and review accommodation needs for future employment, and give student a written description of ideas to be reviewed with providers in the work community</td>
</tr>
</tbody>
</table>
