

November 9, 2020

DIRECTIVE: JOB CORPS DATA CENTER NOTICE NO. 20-092

FROM: Job Corps Data Center

SUBJECT: Job Corps Resumption Schedule and COVID Hotspot Documents

This notice is distributed to All National, All Regional, and All Operators

Two new files are available on JC Web to help centers prepare for resuming physical center operations and returning Job Corps students to their respective centers.

The **Job Corps Resumption Schedule** contains the resumption schedule for Round 1, as of November 9, 2020, with all cohorts scheduled to the 2020 OBS. Each center is mapped on separate lines with cohort rotations following, with the first line outlining the overall process and Cohorts. Cohorts run until OBS is achieved.

The **Center Student CTL (Community Threat Level)** spreadsheet is a pivot table that allows staff to search on criteria, such as Center name and/or Zip Codes of students. COVID conditions are measured in this model by the CDC Community Threat Level, which ranges from 0-3, with zero being the lowest rating and the highest threat for COVID conditions and 3 being the best rating and the lowest threat for COVID conditions. The definition of a “hotspot” as defined and agreed by the DOL Task Force Members is a CTL score of less than a 2. This data will be updated weekly on Wednesdays.

These two files are available on the JC Community Website, in the **Announcements** section.
