**DIRECTIVE:           JOB CORPS DATA CENTER NOTICE NO. 20-114**

FROM:                   Job Corps Data Center

SUBJECT:               New MCI Codes for COVID-19 Infection Tests

In November, some Job Corps centers began resuming on-campus operations and started on-campus COVID-19 infection testing of all center staff and returning students. MCI, the support contractor for laboratory testing, is tracking these test results. To track and analyze results appropriately, Job Corps must know if test results are from a student or staff, and the reason for the test (e.g., initial test, post-quarantine test (i.e., student quarantine exit test), or symptomatic/asymptomatic exposure test). For this purpose, MCI has created and loaded 21 testing codes, together with the instructions, on their website [www.mcidiagnostics.com](http://www.mcidiagnostics.com). Effective immediately, when administering the ID NOW test or shipping the M-2000 PCR test swabs to MCI, Job Corps **centers must enter the correct test code** for all staff and students receiving on-campus COVID-19 testing. These codes are entered into MCI's Laboratory Information System (LIS). Please address all questions to Latasha Hill at MCI by calling (918) 744-1001 or Kathleen Henderson (918) 955-1671.

Listed below are the 21 test codes.
