DIRECTIVE: JOB CORPS DATA CENTER NOTICE NO. 21-061

FROM: Job Corps Data Center

SUBJECT: Adding Three New COVID-19 Test Codes into MCI's Laboratory Information System (LIS)

With the release of PIN 21-01 (Requirements for Assessing and Offering COVID-19 Vaccination to Students) and PIN 21-02 (Change to Entrance Quarantine, Testing, and COVID-19 Mitigation Requirements for Vaccinated, Partially Vaccinated, and Unvaccinated Students), the National Office has decided to add three new COVID-19 testing codes to capture the routine screening test results precisely. Centers should select the following three new testing codes for "Student Routine Screening" when providing students with COVID-19 testing on a regular interval, such as the weekly required testing for students who do not have verification of full vaccination.

MCI Sars-CoV-2 Test Code (slow M-2000 test):
Test #900907: SARS-CoV-2 - Student Routine Screening

Abbott ID Now Sars-CoV-2 Test Code (rapid ID NOW test):
Test #900908: SARS-CoV-2 - Student Positive Routine Screening
Test #900909: SARS-CoV-2 - Student Negative Routine Screening

MCI, Job Corps' support contractor for laboratory testing, is tracking these test results. For this purpose, MCI has created and incorporated these three new codes into their existing testing codes, together with the instructions, on their website www.mcidiagnostics.com. Effective immediately, when administering the ID NOW test or shipping the M-2000 PCR test swabs to MCI, Job Corps **centers must enter the correct test code** into MCI's Laboratory Information System (LIS) for students receiving on-campus COVID-19 testing.

Questions regarding this JCDC Notice should be directed to Lesley Nesmith of the National Office at Nesmith.Lesley@dol.gov. Questions regarding the MCI LIS and coding should be directed to (469) 485-2385 or info@mcidiagnostics.com

Listed below are the 24 test codes. The three new codes are highlighted in yellow.
